Code and Design

Projects // Problem Solving // Coding

Overview

I have completed the Front-End Development curriculum through freeCodeCamp. The projects had numerous user stories that had to be solved. They also had to meet certain guidelines. You can view more of my Projects on my Codepen profile at www.codepen.io/Wes29
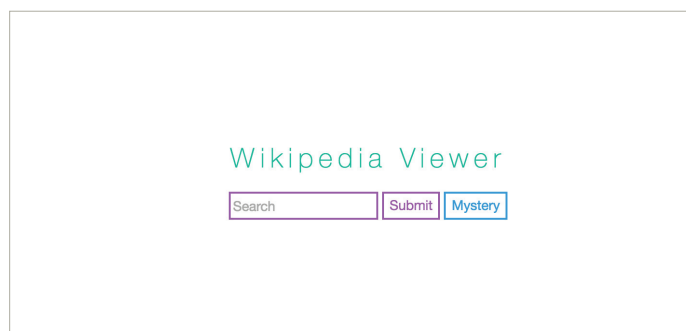

Process

I started my design process on paper. I then made a mock up of how I wanted the project to look in Photoshop. I then created the projects in Atom, and on Codepen using HTML, CSS, and JavaScript.
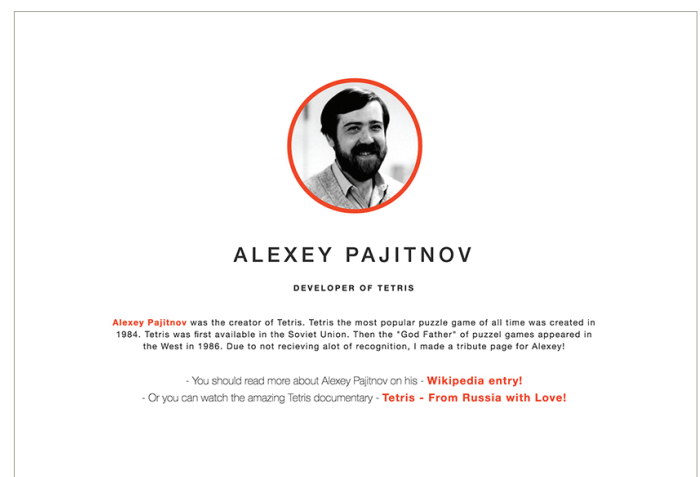

Tools

*   Pen & Paper
*   Adobe Illustrator & Photoshop
*   Codepen
*   Atom Text-editor

Code and Design

Designer **//** Aspiring Coder **//** CreativeThinker

Overview

I am really passionate about web development, and what better way to learn than to jump in head first! I love problem solving and coding. I wanted to code my own personal website which is still in development. I am using Atom Text Editor, codepen and the command line, as well as Google Developer tools to create my personal website. Hosted Github https://wes26.github.io/Site/

Process

I start my design process on paper. I then made a mock up of how I wanted the project to look in Photoshop. I then coded the mockup in Atom. Overall the project turned out great and I loved creating the isometric illustrations.

Tools

* Pen & Paper
* Adobe Illustrator & Photoshop
* Atom Text Editor
* BootStrap
* Google Dev Tools
